- Higher underlying profit in FY25 supported by strong revenue and volume growth in 2H
- Balance sheet strength remains a key focus
- Progressing the implementation of refreshed customer-centric strategy with positive outcomes to date
- Continuing to modernise our technology and leverage AI solutions to deliver better experiences for customers and colleagues
- Delivering on our three key priorities to drive stronger returns: business banking, deposits and proprietary home lending
- Well positioned to deliver sustainable growth and returns over time

Supportive Australian economic environment

- Economic growth has accelerated and is expected to sustain trend rates through 2026
- Household incomes have benefitted from lower inflation and lower interest rates, as well as tax cuts
- Improved business confidence and conditions
- Continued robust credit growth forecast – business credit growth of 7.5% and housing credit growth of 6% in FY26²

Net interest margin

Net interest margin (HoH)

Key 1H26 considerations¹

- Benefit of deposit and capital replicating Portfolios of ~2bps²
- Impact of 25bps RBA cash rate cut on Australian unhedged low rate sensitive deposits estimated at ~1bp annualised³. Outcome subject to several factors including customer behaviour and competitive dynamics which are difficult to predict
- 7bps move in 3 month Bills/OIS equivalent to ~1bp of annualised NIM⁴

(1) Refer to key risks, qualifications and assumptions in relation to forward-looking statements on pages 82-83

(2) Based on market implied 3 and 5 year swap rates trajectory as of 30 September 2025 and stable balances for the Australian and New Zealand capital and deposit replicating portfolios respectively

(3) Based on 30 September 2025 spot volumes and assumes certain pass-through rates on individual deposit products

(4) Based on 30 September 2025 rates and balances. Average 3 month Bills/OIS of ~7bps in 2H25

2H25 revenue

Net operating income (HoH)¹

Markets & Treasury (M&T) income breakdown²

Key revenue drivers HoH

- Strong volume growth and higher margins
- Fees & Commissions reflects lower customer remediation offset by lower business lending fees
- M&T mainly impacted by non repeat of \$54m gain on Insignia notes⁴ and less favourable interest rate positioning

(1) During FY25, the Group updated the presentation of expenses which are directly attributable and incremental to earning income from the provision of banking services. Comparative information has been restated

(2) During FY25, the Group amended the composition of Markets & Treasury income to exclude interest rate revenue on certain customised loans and deposits. Comparative information has been restated

(3) NAB risk management comprises NII and OOI and is defined as management of interest rate risk in the banking book, wholesale funding and liquidity requirements and trading market risk to support the Group's franchises. Markets forms part of C&IB and NZ Banking revenue. Treasury forms part of NZ Banking and Corporate Functions and Other revenue

(4) As part of its financing of the acquisition of MLC Wealth, Insignia Financial Ltd issued \$200 million of five-year structured Subordinated Loan Notes to NAB. NAB requested early redemption of the notes in March 2025, which was declined by Insignia Financial Ltd. As a result of the request for redemption, the total return amount of the notes has been determined and the resultant fair value gain was recognised. The notes (including the increased total return amount) will be repaid in May 2026

Operating expenses

Operating expenses (YoY)¹ (\$m)

FY26 considerations³

- Opex growth expected to be lower than FY25 growth of 4.6%⁴
- Investment spend expected to be ~\$1.8bn
- Payroll review and remediation ongoing (\$130m in FY25)
- Targeting productivity >\$450m

Investment spend

(1) During FY25, the Group updated the presentation of expenses which are directly attributable and incremental to earning income from the provision of banking services. Comparative information has been restated
 (2) AUSTRAC EU-related costs of \$18m (\$89m in FY24)
 (3) Refer to key risks, qualifications and assumptions in relation to forward-looking statements on pages 82-83
 (4) FY26 guidance excluding any large notable items

Balance sheet strength remains a key focus

Well positioned balance sheet

- CET1 ratio comfortably above target of >11.25%
- Pro forma CET1 ratio of 11.81% reflects sale of 20% of MLC Life which completed on 31 October¹
- DRP for 2H25 dividend to be neutralised
- Retained appropriate provisioning with CP/CRWA of 1.33%
- LCR and NSFR well above minimum regulatory requirements
- FY25 GLA growth funded by customer deposits

Appropriate provisioning²

Group CET1² (%)

LCR and NSFR at Sep 25

Deposits increasingly funding GLAs

(1) Pro forma CET1 ratio reflects the impacts of the sale of the Group's remaining 20% stake in MLC Life to Nippon Life Insurance Company for \$497m completed on 31 October 2025

(2) From 1 January 2023 ratios have been reported under APRA's revised capital framework

(3) Includes senior unsecured, secured (covered bonds and securitisation), subordinated debt, AT1 and RBNZ funding facility drawdowns with a remaining term to maturity or call date > 12 months

(4) Excludes deposits in New York and London used for liquidity management purposes

Asset quality

Non-performing exposures (NPL) as a % of GLAs

Watch loans⁴ as a % of GLAs

2H25 outcomes

- CICs and total NPLs higher, but a number of **key asset quality ratios improved** for the first time in several periods:
 - Watch loans down 9bps
 - Default but not impaired ratio down 1bp driven by lower Australian home loan arrears
- **No underlying collective provisioning charge³** - volume growth and reducing impact from asset quality, offset by transfers to individual provisions
- Business lending **single names** impacting impaired ratio and individually assessed charges (C&IB, NZ Banking)

Credit impairment charge (CIC) (\$m)

(1) 'Default but not impaired' includes '90+ DPD but not impaired' assets and 'Default <90 DPD but not impaired' assets aligned to APS 220 Credit Risk Management
 (2) 'Default but not impaired' includes loans that have been classified as restructured in accordance with APS 220 Credit Risk Management which are assessed as no loss based on security held
 (3) Represents collective credit impairment charge less forward-looking provisions
 (4) Watch loans are generally triggered by banker referrals or manual downgrades of customer ratings as part of reviews throughout the year
 (5) Represents collective provision EA and FLAs for target sectors

Provisioning

Total provision balances higher

Key considerations

- **Total provisions of \$6.2bn** (or 1.64% of CRWA) represent 1.6x 100% base case scenario³
- IAP of \$1.2bn, \$0.2bn higher than Mar 25 reflecting **higher business lending impairments** including a small number of customers in both C&IB and NZ Banking
- **CP broadly stable** at \$5.0bn representing 1.33% of CRWA
 - 9bps lower than Mar 25 mostly reflecting strong CRWA growth
 - Includes forward looking provisions of \$1.6bn with Australian downside scenario weighting unchanged (42.5%)

(1) Underlying collective provision for Sep 23 and prior figures includes amounts for collective provisions on derivatives at fair value

(2) Sep 23 and beyond are reported under APRA's revised capital framework effective from 1 January 2023

(3) After excluding \$119m in FLA balances from the 100% base scenario

Group non-retail lending industry sector analysis

Total business lending security profile¹

Business lending portfolio quality

(1) Fully Secured is where the loan amount is less than 100% of the bank extended value of security; Partially Secured is where the loan amount is greater than 100% of the bank extended value of security; Unsecured is where no security is held and/or no value held against the security and negative pledge arrangements may be in place. Bank extended value is calculated as a discount to market value based on the nature of the underlying security

(2) 'Default but not impaired' includes loans that have been classified as restructured in accordance with APS 220 *Credit Risk Management* which are assessed as no loss based on security held

Australia housing lending arrears profile¹

Arrears declining as % of GLAs and limited impairment

90+ DPD² & Impaired assets as a % of GLAs

30+ DPD as a % of GLAs by vintage calendar year

(1) Excludes 86 400 platform. Includes Citi Consumer Business from Sep 24

(2) Includes loans that have been classified as restructured in accordance with APS 220 Credit Risk Management which are assessed as no loss based on security held

Capital remains above operating target

Group CET1 capital ratio

(%)

2H25 CET1 considerations

- Higher CRWA mainly driven by business lending growth and RWA overlays relating to off balance sheet exposures⁴
- Other RWA includes an increase in the capital floor adjustment (-3bps)
- Pro forma CET1 ratio of 11.81% reflects sale of 20% of MLC Life which completed on 31 October³, comfortably above operating target of >11.25%

Credit risk-weighted assets (CRWA)

(\$bn)

(1) Excludes foreign exchange translation

(2) Other capital movements relate to net foreign exchange translation, non-cash earnings, capitalised software, capitalised expenses, reserves and other miscellaneous items

(3) Pro forma CET1 ratio reflects the impacts of the sale of the Group's remaining 20% stake in MLC Life to Nippon Life Insurance Company for \$497m completed on 31 October 2025

(4) Models & methodology CRWA change over Mar 25–Sep 25 includes a RWA overlay of \$4.8bn related to the measurement of certain off balance sheet exposures

Loss Absorbing Capacity and Additional Tier 1¹

Key messages

- Based on the Group's RWA and Total capital position at 30 September 25, NAB has met APRA's Jan 26 LAC requirements
- APRA released an industry letter in Dec 24 which confirmed that it will replace 1.5% AT1 with 0.25% CET1 and 1.25% Tier 2, from Jan 27²
- NAB has \$9.0bn of AT1 as at 30 September 25, which would continue to contribute to Total capital until first call date through to 2032, under APRA's current proposal
- Manageable Tier 2 requirements with \$5-6bn of issuance expected per year noting existing AT1 and Tier 2 maturity profile

APRA changes to major banks' capital minimums

NAB Tier 2 outstanding issuance

NAB AT1 and Tier 2 runoff³

(1) Excludes BNZ issuance which does not contribute to Group capital ratios

(2) Under APRA's approach for large, internationally active banks in the discussion paper: 'A more effective capital framework for a crisis', released on 10 September 2024 and subsequent industry letter dated 9 December 2024

(3) Based on first optional call date (subject to APRA approval, which may or may not be provided) or maturity date (adjusted for any capital amortisation)

(4) Based on remaining term to maturity, with maturity equal to first optional call date where applicable (subject to APRA approval, which may or may not be provided), and adjusted for any capital amortisation

Strong funding and liquidity metrics

Key messages

- Maintained strong funding and liquidity position with LCR and NSFR well above regulatory minimums
- Positioned to manage through periods of market volatility
- Term funding issuance diversified across product, tenor and currency
- FY26 term funding issuance expected to be broadly in line with prior years

Liquidity position well above regulatory minimums

Term funding issuance¹ & maturity profile²

(1) Includes senior unsecured, secured (covered and RMBS) and subordinated debt with an original term to maturity or call date greater than 12 months, excludes AT1 instruments. FX rate measured at time of issuance

(2) Maturity profile of funding with an original term to maturity greater than 12 months, excludes AT1 and RMBS. Spot FX rate at 30 September 2025

Diversified & flexible term wholesale funding portfolio

FY25 Issuance by product type¹

FY25 Issuance by currency¹

Outstanding issuance by product type^{1, 2}

Outstanding issuance by currency¹

(1) Excludes AT1, RBNZ funding facilities
(2) At 30 September 2025, NAB has utilised 48% of its covered bond capacity. Capacity based on current rating agency over collateralisation (OC) and legislative limit

Key areas of focus in FY26

- Execution of strategy to deliver improved customer advocacy, greater speed and simplification
- Ongoing technology modernisation and leveraging AI solutions
- Deliver on key priorities of business banking, deposits and proprietary lending to drive returns
- Disciplined cost management with productivity helping to create capacity for investment
- Maintain prudent balance sheet settings
- Complete migration of Citi Consumer Business to new platform by December 2025

(1) Growth rates are on a customer segment basis and not industry. During the year to 30 September 25 there have been some refinements to customer segmentation impacting Agri, Health and Other, with September 24 balances restated on an equivalent basis

(2) CRE primarily represents commercial real estate investment lending across a range of asset classes including Retail, Office, Industrial, Tourism and Leisure, and Residential

(3) B&PB customers typically have borrowings up to \$50m and turnover less than \$100m. NAB Small business reflects business lending by B&PB's Business Direct & Small Business unit

(4) Derived from latest RBA statistics. Latest data as at Aug 25 excluding financial businesses. Includes business lending relating to both B&PB and some C&IB customers

(5) Represents business lending to non-financial businesses and community service organisations under APRA monthly Authorised Deposit-taking Institution Statistics definitions. Latest data as at Sep 25. Includes business lending relating to both B&PB and some C&IB customers. Key highlights

- #1 market share¹ with ~2.2m customers across NAB, Citi and White Label brands
- Average spend per credit card increased 5% YoY
- Simpler and faster application and digital servicing experiences for customers and bankers
- Deepened customer engagement through strategic merchant partnerships and enhanced rewards
- Scaling a modern unsecured lending platform with intelligent automation and built-in compliance
- Strengthened digital and channel engagement across branches, contact centres and digital platforms
- Reduced products by 19%, and on track for 38% reduction on completion of Citi migration
- Asset quality remains sound:
 - Arrears lower in 2H25
 - Revolve rate of ~64% and continues to trend upwards, primarily driven by changes in interest free days for Citi and White Label card

(1) For 1985 Group business mix, all overseas GLAs are allocated to Commercial category

(2) Data used in calculation of net write off rate as a % of GLAs is based on NAB's Australian geography / company disclosures and sourced from NAB's U.S. Disclosure Document (2021 - 2024), NAB's Supplemental Information Statements (2007 - 2020) and NAB's Annual Financial Reports (1985 - 2006 & 2025)

(3) Home lending represents "Real estate – mortgages" category; Personal lending represents "Instalment loans to individuals and other personal lending (including credit cards)" category; Commercial represents "all other industry lending categories" as presented in the source documents as described in note 2 above

(4) Group average is calculated by applying each of the Australian geography long run average net write off rates by product to the respective percentage of Group GLAs by product as at 30 September 2025. Commercial long run average net write off rate has been applied to acceptances. Major shock periods refer to 1991-1993 and 2008-2012

Provisions

Movement in provisions¹ (\$m)

Underlying CP¹

- Model outcomes based on point-in-time data
- 2H25 decrease mainly reflects the release of CP for impaired customers and foreign exchange movements, partially offset by B&PB business lending

Economic Adjustment (EA)

- Forward view of additional stress across portfolio, according to 3 probability weighted scenarios (upside, base case & downside)
- Scenarios based on forward looking macro-economic data and granular PD and LGD assumptions
- EA top-up required where probability weighted EA higher over the period (and vice versa)
- 2H25 EA increase of \$96m reflecting refreshed economic scenarios²

Target sector FLAs

- Considers forward-looking stress incremental to EA
- Net \$185m decrease in target sector FLAs including release from Retail Trade and partial releases from Commercial Property and Construction

IAP

- Provision for loss where realisable security value is less than defaulted exposure value
- \$243m increase in 2H25 mainly related to a small number of customers in both C&IB and BNZ, combined with B&PB business lending

(1) Excluding the impact of foreign exchange movements, underlying CP change is \$0m Mar 25 v Sept 25

(2) Scenarios, prepared for purposes of informing forward-looking provisions, rely on NAB Economics forecasts at Aug 25 and management judgement

31 Mar 25	2.5	55.0	42.5
30 Sep 25	2.5	55.0	42.5

Total provision for expected credit losses³ (\$m)

Key considerations

- Increase in ECL vs Mar 25 primarily reflects increased IAP balances, deterioration in asset quality and volume growth, partially offset by a net release of \$89m from forward-looking provisions:
 - Net release of FLAs mainly relating to Retail Trade, Construction and Commercial Property
 - EA increase reflects refreshed economic scenarios¹
- Total provision for ECL represents 1.6x 100% base case scenario (after excluding \$119m in FLA balances from the 100% base scenario)

Economic assumptions

Australian economic assumptions used in deriving ECL ¹						
	Base case			Downside

(1) Scenarios, prepared for purposes of informing forward-looking provisions, rely on NAB Economics forecasts at Aug 25 and management judgement

(2) 100% base case, 100% downside and probability weighted scenario all include \$119m of FLAs

(3) ECL excludes provisions on fair value loans and derivatives for Mar 24

Stage 3 (Lifetime ECL)	Credit impaired: default no loss Credit impaired: default with loss	Collective Individually assessed

- Significant increase in credit risk rules are not prescribed by accounting or regulatory standards
- Stage allocations include the impact of forward-looking economic information applied in the expected credit loss model
- Stage 2 includes majority of forward-looking adjustments

(1) Notional staging of loans and advances, including guarantees and credit-related commitments, incorporates forward-looking stress applied in the ECL model

(2) Provision coverage: provisions as a percentage of loans and advances including guarantees and credit-related commitments

(3) Significant increase in credit risk primarily determined by change in credit risk scores for business exposures and change in behavioural scoring outcomes for retail exposures

Agriculture, forestry & fishing exposures¹

Group EAD \$63.2bn September 2025

Key Australian considerations

- Weather conditions have been mixed, with favourable conditions across East Coast, but dry conditions in Western Victoria and South Australia
- Improved confidence and performance with strong commodity prices in various sectors, offset by moderating farm sales activity and valuations from elevated levels in recent periods
- Uplift in NPL ratio during 2H25 mainly due to customer specific issues for two large well secured customers
- ~15% of non-retail lending EAD

Commercial real estate¹

Key asset quality considerations

- Outlook becoming more positive with recent interest rate reductions and rental growth supporting **serviceability (ICR)** and **asset values (LVR)**, and significant increase in **transaction volumes** indicating liquidity is returning to the market
- **Non-performing exposures** remains biased to default but not impaired. Increased from Sep 22 influenced by higher interest expenses not offset by sufficient rental growth for investment lending and delayed project completions / cost over-runs in the development portfolio relating to builder / construction issues
- Material portion of new and renewed CRE Investment lending over FY22-FY24 associated with **LVRs** <60%. Modest increase in higher LVR lending since Sep-24 reflects improved borrower servicing capacity (lower borrowing costs and ICR settings) and targeted sector growth
- Provisioning includes \$59m target sector **FLA**

Sector considerations

- Increased activity in **Development** sector (particularly Residential) supporting lending growth with project feasibility improving through stabilising construction costs
- **Discretionary income** exposed assets remain challenged by increased vacancies and lower tenant demand as a result of cost of living pressures and shift to on-line shopping
- Secondary **Office** assets² lacking Green credentials deemed higher risk, particularly those with shorter lease expiries, less desirable locations and large volume of competing supply; confidence returning for Prime Office assets in most markets
 - C&IB portfolio (~2/3rd of Australian office) biased towards Prime / A-grade assets
 - B&PB portfolio (~1/3rd of Australian office) typically associated with C to D grade assets located in non-CBD locations

Non-performing exposure and as % GLAs

Construction¹

Exposure at default

Key considerations

- Project margins generally recovering; pipeline demand being supported by increased spending in government, infrastructure and defence sectors
- ~4% non-retail lending EAD including subcontractors and construction services
- Highly diversified and secured portfolio
- Provisioning includes \$7m target sector FLA
- ~50% of C&IB exposures are contingent facilities e.g. performance guarantees

(3) General Construction – Non Building EAD includes construction activities such as infrastructure, leisure, irrigation, mining etc

Tourism, hospitality and entertainment¹

Exposure at default

Key considerations

- While consumer spending is improving, the Hospitality sector continues to be challenged by elevated operational costs (e.g. input, wage and energy expenses), labour shortages and competitive pressures
- Outcomes continue to differ by demographics and geography creating stress in certain segments, particularly restaurants
- ~4% of non-retail lending EAD

Internationally comparable CET1 ratio		17.1

- (1) Internationally comparable methodology based on the Australian Banking Association publication 'Basel 3.1 Capital Comparison Study' (March 2023), which compares APRA's revised capital framework, including Reserve Bank of New Zealand (RBNZ) prudential requirements, with the Finalised post-crisis Basel III reforms. The internationally comparable capital ratios do not include the impact of the Basel capital floor, where 60% is the Basel transitional capital floor that has applied since 1 January 2025
- (2) Other includes the impact of concessional Credit Conversion Factors (CCFs) for certain credit commitments in the Basel framework, and APRA requirements for margin lending and specialised lending exposures not in the Basel framework

Progress reported annually in NAB's reporting suite: nab.com.au/annualreports

(1) Ambition reflects cumulative total of new financing activity from 1 October 2023 to 30 September 2030. Refer to page 42 of the 2025 Climate Report for further information

(2) In 2025, NAB achieved its \$6 billion affordable and specialist housing financing goal by 2029, four years ahead of schedule. NAB has set a new and expanded ambition to provide \$60 billion in financing to address housing affordability by 2030. Refer to pages 21-22 of the 2025 Annual Report for further detail on the housing affordability financing ambition

(3) Lending position refers to 'Gross Loans and Advances' to both direct First Nations Businesses (with >50% First Nations Ownership), and community organisations that deliver benefits to First Nations peoples, identified by NAB's First Nations business team and/or validated against Supply Nation, Office of the Registrar of Indigenous Corporations (ORIC) and Australian Charities and Not-for-profits Commission (ACNC) registered charities. Additional checks performed on ACNC dataset to test relevance. Baseline position (\$417.2m) calculated as at 31 August 2023. Reference to the 2026 target end date is calendar year (31st December 2026)

Power generation exposures

Group power generation EAD by fuel source^{1,2}
(AUD\$bn)

- 78% of total power generation financing to renewables²
- Renewable portfolio represents a mix of wind, hydro and solar energy sources
- NAB has set an interim sector decarbonisation target for power generation, details available in the 2025 Climate Report

(1) Totals presented in chart may not sum due to rounding

(2) NAB methodology (using NAB's extension of 1993 ANZSIC codes that distinguishes between different types of energy generation) on a net EAD basis. Excludes exposure to counterparties predominantly involved in transmission and distribution. Certain renewable power generation companies in New Zealand may utilise strategic energy reserves that are non-renewable as critical back-up to support security of energy supply in New Zealand. NAB has no direct lending to coal-fired power generation assets remaining. Note there is indirect exposure to coal-fired power within the Mixed Fuel category as a result of NAB's corporate level exposure to gentailers, which have a mix of generation assets (including coal, gas and renewables) within their generation portfolios

Resources exposures

Resources EAD by type^{1,2,3}

(AUD\$bn)

- Exposure to thermal coal on track to be effectively zero⁴ by 2030 excluding performance guarantees for rehabilitation of existing coal mining assets

- (1) Totals presented in chart may not sum due to rounding
- (2) Oil and gas extraction exposures includes lending (e.g. revolving/term lending and guarantees) and other markets-related exposures (e.g. derivatives, repurchase agreements)
- (3) Thermal coal exposure means direct exposure to customers and projects whose primary activity is thermal coal mining, on a net EAD basis, using NAB's extension of 1993 ANZSIC codes that distinguishes between different grades of black coal. Includes lending, derivatives, financial guarantees and performance guarantees for the rehabilitation of existing coal mining assets. It excludes customers whose primary activity is metallurgical coal mining, diversified mining customers and transactional banking (including deposit services) that do not give rise to EAD and similar ancillary products and services
- (4) 'Effectively zero' refers to the fact that the Group may still hold some exposures to thermal coal in 2030, only through residual performance guarantees to rehabilitate existing coal mining assets. These guarantees are excluded from the financed and facilitated emissions coverage of NAB's thermal coal sector target

Thermal coal mining and oil and gas limits

Thermal coal mining exposure¹

(AUD\$bn)

Oil and gas extraction - exposure²

(USD\$bn)

- NAB has further reduced exposure to thermal coal, and as at 30 September 2023, NAB no longer has any (a) corporate lending to thermal coal mining customers or (b) project finance in respect of thermal coal mining assets. NAB intends to maintain this position into the future
- Rehabilitation performance guarantees make up 51% of exposure at Sep 25, remainder is predominantly financial guarantees

- Oil and gas presented in USD as majority of portfolio is denominated in USD³
- NAB's oil and gas sector decarbonisation target guides intended financed and facilitated emissions reduction. See 2025 Climate Report for full details

NAB's coal and oil and gas related policies and risk appetite settings are available on pages 17-18 of NAB's 2025 Climate Report

Disclaimer

There are many factors that could cause actual results to differ materially from those projected in such statements, including (without limitation) a significant change in the NAB Group's financial performance or operating environment; a material change to law or regulation or changes to regulatory policy or interpretation; and risks and uncertainties associated with the ongoing impacts of the Russia-Ukraine and Middle Eastern conflicts and other geopolitical tensions, the Australian and global economic environment and capital market conditions and changes in global trade policies. Further information is contained in the NAB Group's Annual Report for the 2025 financial year, which is available at www.nab.com.au (or, for US investors, in NAB's 2025 Full Year U.S. Disclosure Document).

NAB uses cash earnings (rather than statutory net profit attributable to owners of NAB) for its internal management reporting purposes and considers it a better reflection of the NAB Group's underlying performance. Accordingly, information is presented on a cash earnings basis unless otherwise stated. Cash earnings is not a statutory financial measure and is not presented in accordance with Australian Accounting Standards nor audited or reviewed in accordance with Australian Auditing Standards. Cash earnings is calculated by excluding discontinued operations and certain other items which are included within the statutory net profit attributable to owners of NAB. The definition of cash earnings is set out on page 87 of the NAB Group's Annual Report for the 2025 financial year (or, for US investors, in NAB's 2025 Full Year U.S. Disclosure Document), and a discussion of non-cash earnings items and a full reconciliation of the cash earnings to statutory net profit attributable to owners of NAB is set out on pages 155-156 of the same document. The NAB Group's financial statements, prepared in accordance with the Corporations Act 2001 (Cth) and Australian Accounting Standards, and audited by the auditors in accordance with Australian Auditing Standards, are set out in the 2025 Annual Report (or, for US investors, in NAB's 2025 Full Year U.S. Disclosure Document).
